

## Fox Class - *Why did the Romans settle in Britain?*

### Academic:

This half term we are focusing on Why did the Romans settle in Britain? Fox Class will be looking at the Roman Invasion and the impact this had on Britain and many other areas. They will be looking at different buildings in Rome.

In Maths the children will be finishing the Multiplication and Division unit before moving on to Area. In English the first unit will be looking at dialogue through a narrative focusing on a historical story. In PE this half term we have secured Plymouth Argyle Football training to visit us once a week on a Thursday. The other session of PE will be on a Wednesday and this will be Hockey (Quicksticks). In Design and Technology, we are looking at wearable technology and how this has changed over the years from when they were first invented to today.

### Character:

This half term our focus virtues are resourcefulness, creativity, aspiration and leadership. This will be taught in classes, through assemblies and through PSHE sessions. We also look for any other virtue that we see in action and are looking forward to celebrating these in our celebration assembly.

### Community:

This half term there are many community events; we have Bradworthy school coming to visit us in January for a sports event, and then we have a visit to Rosemoor. We will also have another Reading Cafe open to parents. I am sure there will be other visitors in school throughout the half term to visit and we will make sure these visitors feel welcome in our school community.

### Digital and Innovation:

This half term in our Design and Technology unit the children will be looking at how technology has changed over the years and how wearable technology such as smart watches, VR headsets and many other devices have changed and developed.
